Ugochukwu Chibuzor

Software Developer

I am a motivated **Flutter Developer** and **UI/UX Designer** with hands-on experience gained through building multiple personal and academic projects. I am skilled in designing and developing **responsive, user-centered applications** with a focus on clean architecture, intuitive interfaces, and performance optimization. I am passionate about **creating seamless digital experiences**, learning new technologies, and continuously improving both my design and my development skills. I am eager to contribute creativity, technical knowledge, and my problem-solving ability to real-world projects and collaborative teams.

Education

Information Processing Science, Degree Programme in Digitalization, Computing and Electronics, Bachelor and Master of Science (3y + 2y)

September
2024 - June

University of Oulu,

I am currently pursuing a five-year integrated degree (DICE) combining a **Bachelor's in Information Processing Science** and a **Master's in Software Engineering**. This program emphasizes **software development, data processing, system design, and computational problem-solving**, providing a strong foundation in both theoretical computer science and practical engineering principles.

Project

TaskM – Team Task Manager

Flutter • Supabase • UI/UX Design

A task management app that enables teams to organize, assign, and track progress in real time. Designed with a clean, modern UI and structured using scalable architecture for maintainability.

MoodTrak – Emotion Tracking App

Flutter • HiveDB • Local Storage

Helps users log daily moods, visualize emotional patterns, and reflect on mental well-being.

Portfolio Website

HTML • Tailwind CSS • JavaScript

A personal developer portfolio showcasing my projects, skills, and design work, optimized for both mobile and desktop devices.
